CASE 2

- A 6Y GIRL WITH COUGH AND PLEURITIC PAIN

PLEURAL HYDATIDS

diagnosis

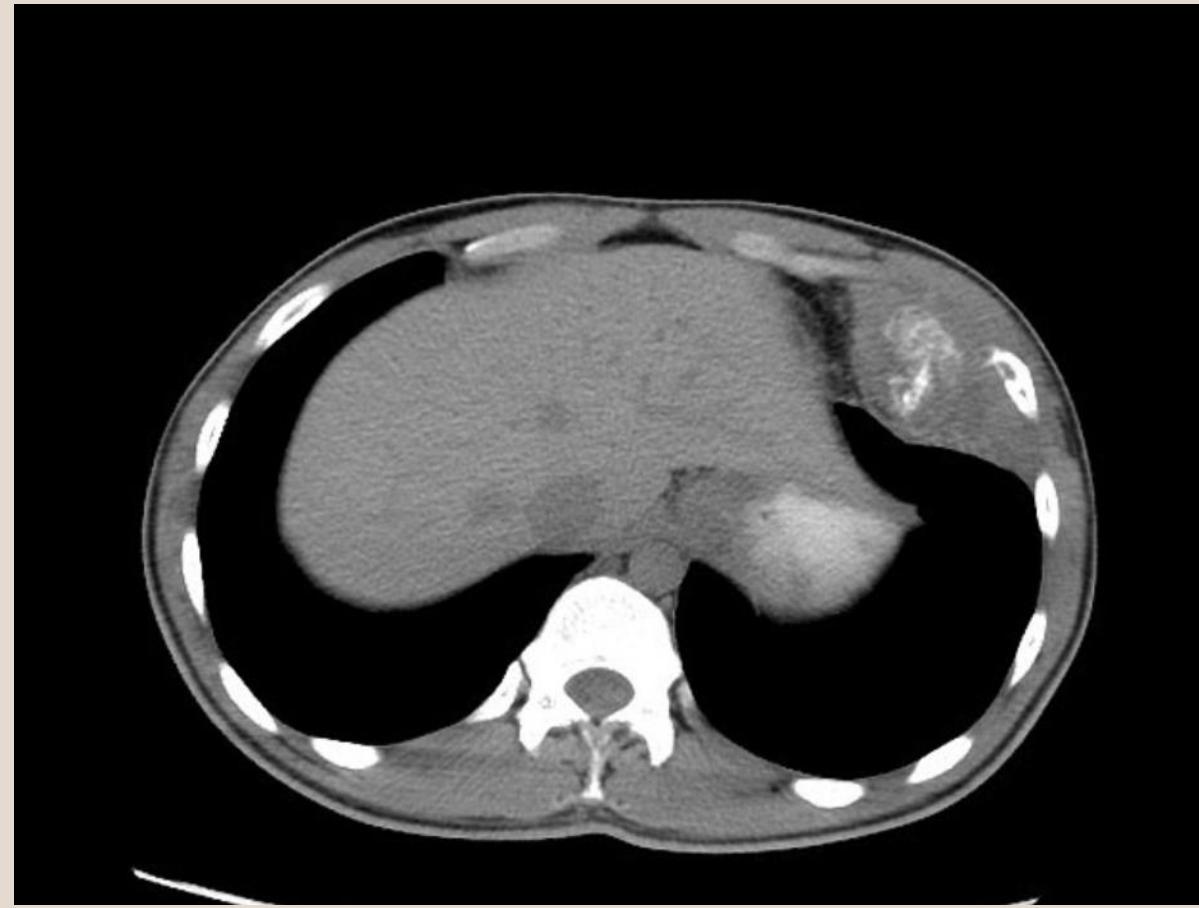

PLEURAL HYDATIDS

A photograph showing a close-up of a person's hands, with light-colored nail polish, gently holding a small, thin-stemmed plant with small green leaves and yellowish flowers. The person is wearing a patterned dress with a red and orange floral or dot design. The background is a soft, out-of-focus grey.

Differential diagnosis

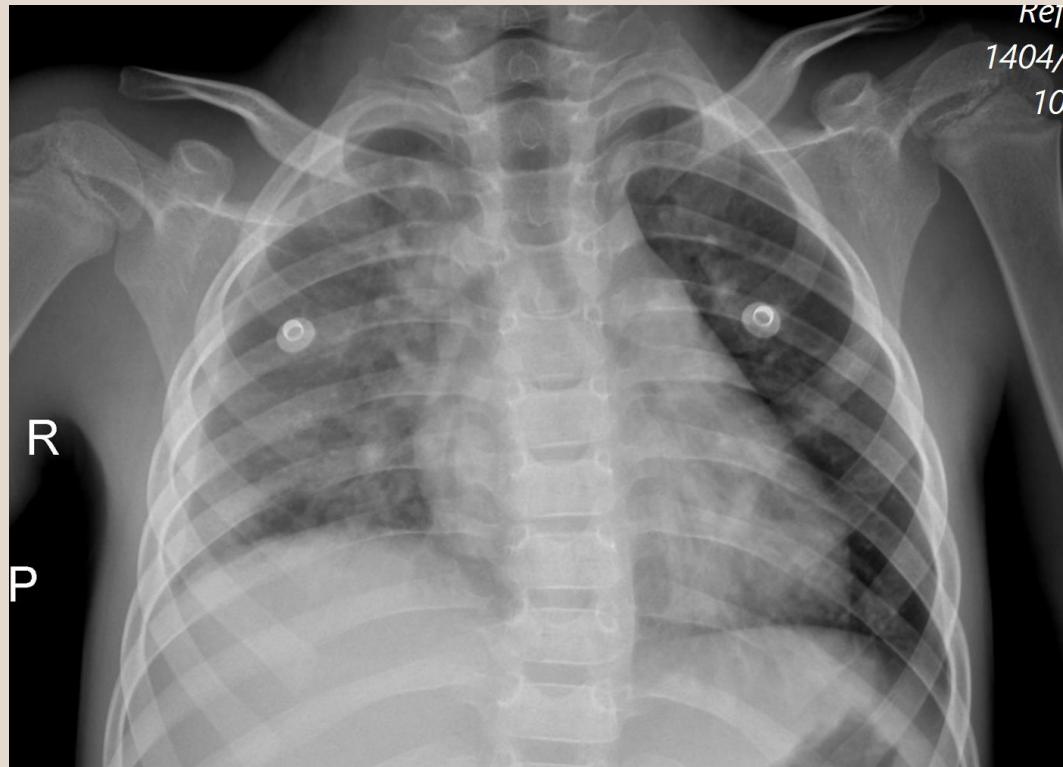

- EMPYEMA
- ASKIN TUMOR

EWING SARCOMA(ASKIN TUMOR)

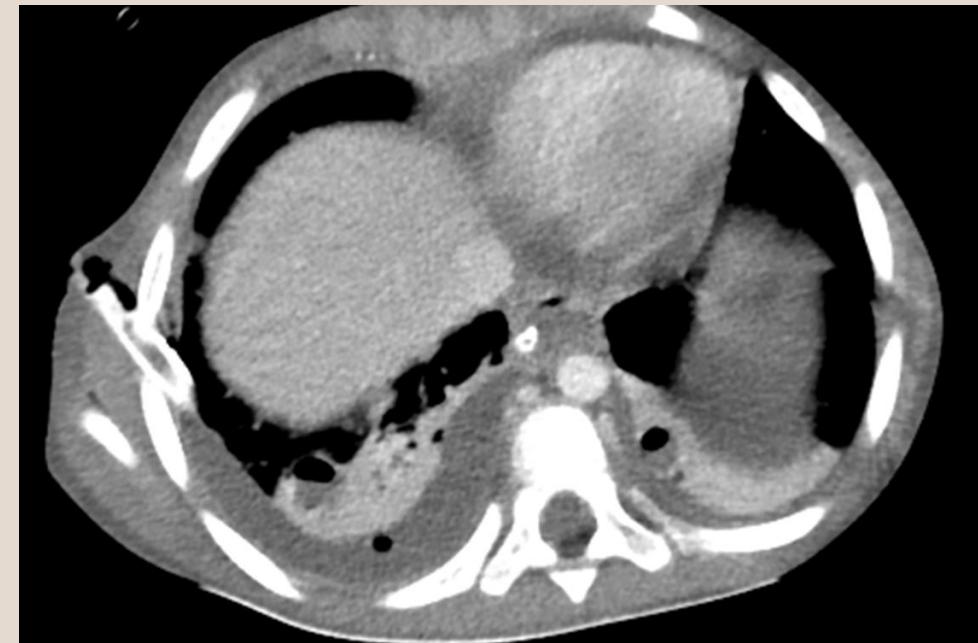

CASE 3

- A 7Y GIRL WITH NECROTIZING FASCIITIS AND FEVER AND COUGH

SEPTIC EMBOLI
